

## Technology Assessment Program

The Scott and White Health Plan (SWHP) Technology Assessment Committee (TAC) evaluates the efficacy, safety and cost effectiveness of new, replacement or currently uncovered medical and behavioral procedures, devices, tests or treatments for consideration of coverage by SWHP. SWHP determinations regarding new pharmaceuticals and/or biologicals are reviewed through the SWHP Pharmacy and Therapeutics Committee. Coverage determinations apply to all SWHP facilities and providers and new technology not approved by the TAC and SWHP are considered to be experimental and investigational and not covered benefits by SWHP.
